Senior Software Engineer at Manhattan Associates with 4.5+ years of experience in enterprise Order Management Systems (OMS), Java, Spring Boot, microservices, REST APIs, and SQL. Experienced in resolving critical production issues, optimizing payment integrations, and delivering backend enhancements for enterprise retail clients, improving system reliability and operational efficiency. Building AI-powered solutions using Python, LangChain, LangGraph, RAG, and multi-agent LLM architectures to automate software development workflows and improve developer productivity.

Domain/Functional Areas

• Supply Chain

Key Skills

Languages: Java, Python, SQL, Apache Velocity

Frameworks & Libraries: Spring Boot, FastAPI, Angular, LangChain, LangGraph, DeepAgents, LiteLLM

AI & Agentic Systems: RAG, AI Agents, MCP, Prompt Engineering, NLP

Machine Learning & Inference: Hugging Face Transformers, Deep Learning, Reinforcement Learning, vLLM

Databases & Messaging: Oracle SQL, SQLite, Qdrant, ChromaDB, Kafka

LLMOps & Observability Tools: LangSmith, LLM Tracing, LLM Evaluation, Model Monitoring

Architecture & Practices: REST APIs, Microservices, CI/CD

Cloud & DevOps Tools: AWS, Docker, Kubernetes, GitHub Actions

Professional Experience

Manhattan Associates, Inc. **Bengaluru**

Senior Software Engineer (Full-Time) Dec 2021 - Present

- Engineered "Pick-to-Light" ELS modification and Angular UI extension for the Prepare Pickup workflow, letting store associates trigger physical rack lights to locate inventory and cutting pickup time.
- Automated settlement replay with an AI-driven workflow that extracts, updates, and resends XML payment requests, reducing manual reconciliation effort recovered $700K + worth of pending settlements.
- Architected "Code Buddy", a multi-agent AI coding platform on DeepAgents and LiteLLM, plus a secure, RBAC-compliant Hybrid RAG system that queries 15 + data sources.
- Resolved 50+ critical production issues and optimized payment integrations for enterprise retail clients, improving reliability by 60%.

Skills: Python, Java, SpringBoot, SQL, Apache Velocity, Angular

Projects

Code Buddy (Multi-Agent Coding Platform) Project Link Oct 2026 - Oct 2026

[DeepAgents / LiteLLM / Docker / TypeSafe Jev / Python / Generative AI]

- Designed and built a terminal-based, multi-agent AI coding platform that streamlines software engineering workflows and cuts task turnaround by 70%.
- Containerized development tasks with Docker and orchestrated them through DeepAgents, LiteLLM, and TypeSafe Jev to run complex work securely.
- Implemented 6 + coding guardrails that enforce code quality, standardize AI-generated output, and keep execution environments safe.

Healthcare Hybrid RAG System Project Link Sep 2026 - Sep 2026

[Python / Vector Databases / SQL / LLMs / Retrieval-Augmented Generation (RAG) / RBAC]

- Launched a Hybrid RAG system with integrated SQL querying that helps hospital staff retrieve medical and operational data across 50 documents and 2 tables.
- Enforced strict role-based access control across 5 employee roles so every AI-generated response and data access met security standards.
- • Combined unstructured document retrieval with structured SQL extraction to deliver context-aware answers at 70–80% accuracy on a 50–question evaluation set.

Enterprise Order Management System (OMS) Dec 2021 - Present

[Java / Spring Boot / Angular / Apache Velocity / SQL / REST APIs / Microservices architecture]

- Customized core OMS functionality with Java and Spring Boot microservices and Angular UI extensions, shipping 80+ enhancements for enterprise retail clients.
- Integrated MAO-CommerceTools and ProShip shipping to support order fulfillment, cancellation workflows, and error handling for 1500+ orders per day
- Developed Apache Velocity notification templates and error-handling logic that improved observability and cut related support tickets by 30%.

Education

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV) **Sagar**

B.Tech - Computer Science

CGPA 6.9

State Level MMA Champion

Won the Karnataka state MMA championship belt 3 times.

Participated in Amateur and mature professional MMA events.
